EXPERIENCE

07/2026 to Current

AI Lab Tutor (Casual)

Success Tutoring – New Lynn, Auckland

- Planned and led interactive AI workshops for primary-school-aged students.
- Introduced foundational AI concepts, prompt writing, problem-solving techniques, and principles of responsible AI use to enhance student understanding.

- Developed presentations, demos, and activity materials that facilitated engaging and effective student learning.
- Guided students through practical exercises with AI tools, reinforcing their skills and confidence in applying AI concepts.

05/2017 to 02/2023 Warehouse Assistant

New Zealand Insulators – Kumeu, Auckland

- Managed forklift and pallet jack operations to transport materials efficiently within warehouse.
- Supported shipment loading and unloading with careful product handling and compliance with safety practices.
- Organized and labeled inventory to ensure accurate warehouse stock management.
- Kept work areas clean and orderly to uphold safety standards in warehouse operations.

11/2014 to 03/2026 Pack House Assistant (Seasonal, Part-time)

Danube Orchards – Whenuapai, Auckland

- Packed produce for retail delivery and display.
- Inspected strawberry punnets for quality and consistency to ensure product standards.
- Contributed to fast-paced production by maintaining an efficient pace and focus on tasks.
- Achieved team productivity goals by collaborating effectively with colleagues while maintaining accuracy.

EDUCATION

11/2025 Bachelor of Computing Systems

Unitec Institute of Technology – Auckland

11/2023 New Zealand Diploma: Information Systems

Unitec Institute of Technology – Auckland

PROJECT EXPERIENCE

SchoolHIVE Marketplace NZ

Capstone Project | July 2025 – November 2025

Collaborated within a software development team to design and build a web-based marketplace platform connecting New Zealand schools and communities. The project achieved 1st Place at the Unitec Whānau Day Showcase.

Key Contributions

- Developed responsive user interface components using React.js and Material UI.
- Built and enhanced homepage functionality and marketplace listing pages.
- Ensured compatibility across desktop, tablet, and mobile devices.
- Collaborated using GitHub version control and Agile-style workflows.
- Contributed to testing, quality assurance, milestone planning, and deployment activities.
- Assisted with stakeholder presentations and final project delivery

Quinelo – AI Quiz Generation platform

Founder & Full Stack Developer | 2026 – Present

Designed, developed, deployed, and maintain an AI-powered educational platform that enables teachers to generate customised classroom-ready quizzes.

Key Contributions

- Built the application using React.js, Firebase Authentication, Cloud Firestore, and Material UI.
- Integrated AI-powered quiz generation through serverless APIs.
- Developed secure user authentication and document management functionality.
- Implemented subscription management and usage-limit controls.
- Deployed and maintain the application using Vercel and a custom domain.
- Continue to enhance the platform through ongoing testing and user feedback.
- Led all aspects of design, development, deployment, and product improvement.
